

■ Farfisa presents Easylook, a modern and prestigious line that innovates the video intercom offer with two new important features: extension up to 4 internal door stations and intercommunication function. The one-way system includes two video intercom kits (1FEV/4 and 1FEVP/4) with two wires only, with aluminium flush-mounted and plastic surface-mounted external door station, respectively. Easy to install and extremely practical, Easylook requires no back box installation inside the home. A convenient video intercom line capable of satisfying the most diverse requirements, with a wide selection of accessories and technical features:

- •4" wall-mounted flat screen
- clear image display
- connection to electrical mains (100-240 Vac)
- video intercom surface mounted
- adjustable volume
- mechanical adjustable camera
- up to 100-m distance between monitor and external door station
- camera automatic switching on
- door lock release (with separate transformer and two additional wires)
- rain shelter

■ Easylook comes from careful investigations towards improved audio-visual quality and elegant design. It is the intelligent answer developed by Aci Farfisa to provide a high-performance product with reliable advanced functions.
