

Form and function in perfect harmony

With ingenious design features that haven't been seen before, Synergy marries great looks with high quality components. The result is a diverse and complete offer of highly evolved solutions that can cater for most needs in today's demanding residential and commercial markets.

RESIDENTIAL

With the explosion of the home entertainment market, wiring devices are becoming increasingly diverse and abundant within homes.

Synergy's vast selection of functions together with a choice of styles and finishes guarantees that homes will be future-proof for years to come.

COMMERCIAL

In addition to a fully integrated grid system which is available in all of the stunning finishes, Synergy also incorporates modular faceplates that can accommodate Legrand's acclaimed Mosaic modules, providing Synergy with an even wider selection of functions available.

The specifier's dream... the installer's delight

Whatever the application, residential or commercial, Synergy offers the perfect blend of style and functionality, together with countless features that have been specially designed to make the installer's life easier.

Thoughtful design...

Synergy is the result of exhaustive research carried out over a five year development period to ensure that the needs of interior designers, installers and end users alike are not only met, they are far exceeded.

Each Synergy family can be instantly recognised by its trademark triple LED signature for location or power indication which gives a unique contemporary look.

Synergy boasts a host of functions and design elements including separated rockers and contrasting finishes that make it ideal for use within Part M regulations

To request a free copy of our Part M guide contact us on 0845 605 4333 or visit www.legrand.co.uk

Attention to detail

Quality is reflected in everything from the components and design through to the ease of installation. This includes a complete range of compatible surface mounting back boxes, compact mechanisms that maximise wiring space, large angled screw entries and clear laser marking as standard.

In addition, all terminals are deep with an easy cable entry design and all mechanisms are supplied with backed-off screws.

QUALITY AND INNOVATION... WHICHEVER WAY YOU LOOK AT IT

<p>Unique LED packs for location or power indication - invisible until activated</p>	<p>Large contoured rockers with precision action</p>	<p>Elegant slim contours</p>	<p>Large angled terminal entries with backed-off screws</p>
<p>Patented triple action safety shutter system</p>	<p>Supplied with optional screw caps</p>	<p>Compact mechanisms for maximised wiring space</p>	<p>Clear and comprehensive laser marking</p>

Styles and finishes to suit every application

Accessories need to match every conceivable decor. Not just in terms of colour, but also in terms of style. To satisfy these requirements, Synergy evolved into distinctly different forms - modern, traditional and rope edge... each of which caters for equally different themes, "warm" and "cool".

White	Modern silver	Modern nickel	Rope edge polished brass	Traditional satin brass	Traditional brushed steel	Traditional polished steel	Metalclad
Clean and modern with optional screw covers and hidden LEDs	Blend perfectly into "cool" environments	Create a "warm" contemporary living space	Classic style with no visible screws	Tasteful design with slim faceplates	Elegant, functional solutions	Stunning mirror finish for "cool" environments	A perfect "clam" type fit with their surface back boxes
