

A famous name with a fresh new look

The Tenby name has always been synonymous with quality, and by harnessing the international design and development resources of Legrand, the range has evolved to meet the style requirements of today's end users and the installation needs of today's professionals.

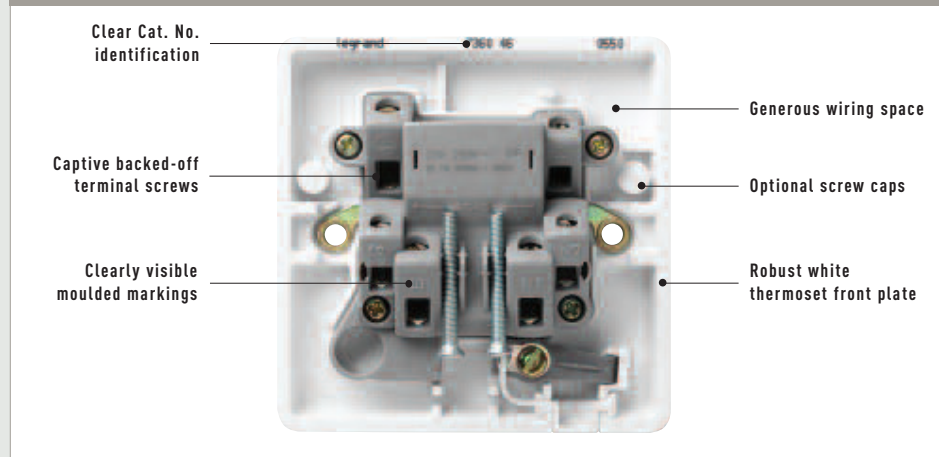

The installer's choice

With its trademark looks, the Tenby range of wiring accessories has always been a firm favourite in the UK.

The latest incarnation of the range has clean, simple lines with rockers that are now larger and slightly contoured for a more tactile feel.
